Course Description:
Basic Editing will ground students in the fundamentals of video editing while providing practical hands-on training using a digital non-linear editing system. Students will learn a brief history, terminology and philosophies of editing and practice hands-on editing skills by working on PCs running Avid Media Composer editing software.

Prerequisites (If any): None

Goals and Objectives:
By the end of the course students should understand the basic concepts and techniques of editing video and have a working knowledge of Avid software. All students will complete the course by editing a short video news story and producing an original photo slide show.

Course Topics:
Video editing concepts, history and terminology, Avid Media Composer software, industry trends, video editing technology
