Smart drivers make safe roads.

**SHARE THE ROAD**

www.njsmartdrivers.org

**Why share the road?**

Half of all motorcycle crashes in NJ involve another vehicle, and half of these are caused by "driver inattention." You can help save riders' lives simply by learning to share the road.

Riding season in New Jersey is May-October!

You should always watch for motorcycles, but they are easiest to miss in the spring—when you are not used to seeing them. When the weather gets warm, watch for riders!

**Who's behind the helmet?**

What comes to mind when you think of a motorcyclist? The truth is that riders are a diverse group drawn from all age groups and lifestyles.

- 41 is the average rider's age
- 10% of riders are female
- 89% of passengers killed in crashes are female
- 50% of riders killed are over age 40
