

School Load Default Rate for FDU 2012-2014

Please see the chart below. It is the latest published figures. The Department of Education publishes cohort default rates every September. There is always a 3 year lag in data. Also note that the default rate increased in FY2014 because it is the first time that DOE reported a 3 year rate. Previously they were only reporting a 2 year rate. We are using the FY2014 figure of 6.4%. It represents the **3 year cohort** default rate.

ENROLLMENT: To provide context for the Cohort Default Rate (CDR) data we include enrollment data (students enrolled at any time during the year) and a corresponding percentage (borrowers entering repayment divided by that enrollment figure). While there is no direct relationship between the timing of when a borrower entered repayment (October 1 through September 30) and any particular enrollment year, for the purpose of these data, we have chosen to use the academic year ending on the June 30 prior to the beginning of the cohort year (e.g., FY 2014 CDR Year will use 2012-2013 enrollment).
